

an electro-optic device configured to form image light in response to the display image data; and

22. (Amended) A method of displaying an image with a projection display apparatus that includes an electro-optic device and carries out processing with information stored in a portable memory, the method comprising the steps of:

preparing display image data by using the image data stored in the portable memory according to an instruction of a processing program that is read from the portable memory and represents a series of processing steps to be executed by the projection display apparatus to display the plurality of presentation sheets;

causing the electro-optic device to form image light in response to the display image data; and

projecting the image light to display the image.

23. (Amended) A projection display apparatus comprising:

-2-

B2
concluded

means for preparing a display image data from information read by said means for reading, said display image data representing the plurality of presentation sheets, said display image data being prepared according to an instruction of processing program read from the portable memory;

means for forming image light in response to said display image data; and

means for projecting said image light on a projection screen to thereby display the presentation sheet.

B3

50. (Amended) The apparatus of claim 23, further comprising means for selecting at least one of image data supplied externally and image data read from the portable memory according to an instruction of selection included in the processing program; and

means for preparing the display image data using the selected image data.

B4

54. (Amended) The apparatus of claim 23, further comprising:

means for storing embellishment image data; and

means for combining at least one of the image data read from the portable memory and the image data supplied externally with the embellishment image data according to an instruction of composition included in the processing program, so as to prepare the display image data.

B5

59. (Amended) The apparatus of claim 23, further comprising means for editing the processing program, and

means for writing the processing program edited by the processing program editor into the portable memory.
